HARDCAT TOOL MANAGER

*Do you know
how many tools you have,
where they are,
who has them and
how they are being used?*

Hardcat Tool Manager can be either a centralized or point solution.

Real-time visibility and management of your tools and equipment inventory.

Avoid stalled productivity, improve tool utilization and reduce losses due to stolen or misplaced equipment.

Track issues and returns, expenses, warranties, create calibration schedules.

Simple and detailed reporting with user defined dashboards makes Hardcat Tool Manager a must for every company.

**HARDCAT**®
ASSET MANAGEMENT WORLDWIDE

In organisations where accountability of tools and equipment is essential Hardcat Tool Manager lets you to know exactly where all you tools and equipment are, where they have been, and who has been responsible for them at any given time.

All your tools and equipment as well as your staff and contractors have a comprehensive audit trail in the Hardcat database. Hardcat Tool Manager provides flexible reporting options to analyse historical data as well as automated alerts and notifications to support the management of your tools and equipment.

INVENTORY

Hardcat Tool Manager allows companies to structure and catergories their entire tools and equipment register within the core module and at the same time collect, track and report on a wealth of information about each piece of equipment. Information held against each item can be accessed and sorted by virtually any field. Each item in the database can have as many as 10,500 associated fields

- Asset details (type, serial number, description, gps coordinates, barcode ect)
- Asset Type/ sub type - Unlimited configurable hierarchy
- Product type
- Purchase price, Current value
- Warranty/ maintenance/ Calibration dates
- Components (children assets) and attachments
- Locations- Unlimited configurable hierarchy
- Person - Unlimited configurable hierarchy
- Supplier and maintenance provider
- Complete history log per item in database
- Cost centre and ownership
- 9999 user definable fields per item
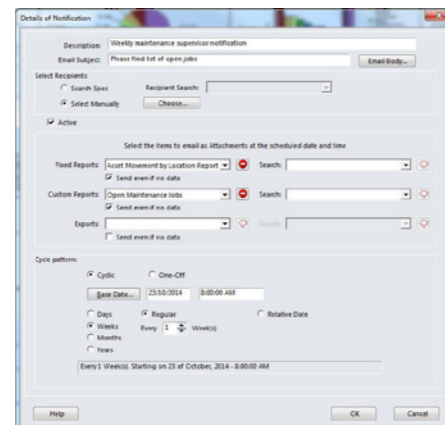

MAINTENANCE /CALIBRATION

The maintenance Plug- option allows users to set common tasks or templates and automatically schedule work orders for maintenance, inspections and calibrations on all tools and equipment.

AUDIT AND CONTROL

In organisations where accountability of operational tools and equipment is essential HARDCAT tools Manager allows you full visibility to know exactly where all you tools and equipment are, where they have been to and who has been responsible for them at any given time. Each Tool or piece of equipment as well as person in the HARDCAT data base has its own comprehensive audit trail.
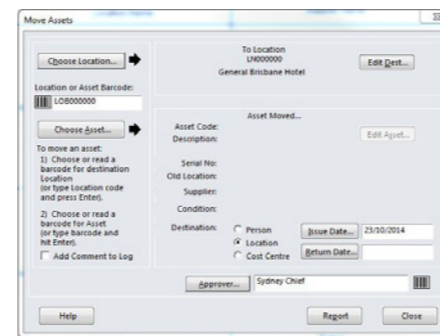

VISIBILITY, NOTIFICATIONS AND REPORTS

Information held against each item in HARDCAT TOOL MANAGER can be accessed and sorted by virtually any field. This can be presented as either real time dashboards, pda reports or exported directly into excel. Critical events can be set up to send automatic email alerts to single or multiple recipients and automatic alerts can pop up within the system to notify users of changes to specific fields. This is in addition to the extensive history log that is kept for each item in the database which record every fields current value as well as past value who made the change and when it was made.
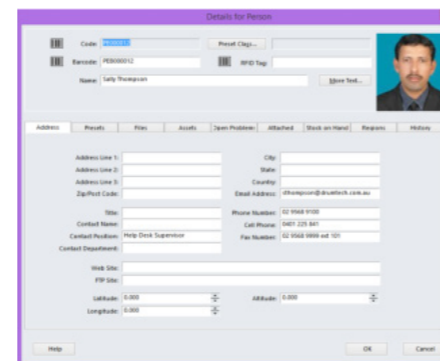

ISSUE AND RETURNS

Hardcat Tool Manager completely simplifies the process of checking out or issuing of tools and equipment. Workshop staff simply access staff members record and then scans barcodes,rfid or DPM marked tools to assign the items to the staff member.

- Reduce tool and equipment loss and misuse
- Track the equipment across multiple locations and jobsites
- Fully searchable and auditable procedure
- Eliminates lines at workshops

PERSONNEL

Hardcat Tools Manager provides for detailed records for each staff member as well as external contractors, Staff memebers can be looked up from configurable tables or their records accessed directly via, barcodes, Rfid, Staff numbers or even biometrixs.

CONSUMABLES/STOCK

The Stock Manager plugin permits users to track parts and consumables, know the quantities and where the items are located as well as tracking how, when, by whom and how much of these items are being consumed. Having an accurate inventory of spare allows an organisation to immediately effect repairs.

- User defined reorder alerts
- Audit trail of stock usage
- Automated process of stock taking ensuring accuracy

MOBILITY

Hardcat Tools Manager and all of the associated plugins are available on Mobile PDA devices which allows tools management to happen in the field and on the job sites.

The Hardcat Tools Managers Mobile phone app "MICAT" is a game changer for organisation with large mobile work forces with staff members able to see exactly what tools have been issued to them when the are due for return as well as being able to access work order in the field as well as a host of other exciting features * please see Micat brochure

TAGGING

There is very little point in having a comprehensive inventory of all your tools and equipment if you can't identify one item from another, Hardcat Tool Manager can accommodate all of the different methods available for marking your tools and equipment such as Barcodes, Qr Codes, Dot Peening, RFID and NFC. These methods can be used in combination with the right tagging method selected for the particular tool. All methods can be read via pda devices.

INVESTMENT

Hardcat Tool manager systems start from as little as $5000 USD and as the solution is modular so you only pay for those plug in's your organisation requires. Systems sizes can accommodate organisation with a few hundred tools to those with upwards of a few hundred thousand tools.

Over 3,000 blue chip organisations in over 120 countries around the world have chosen Hardcat for their fixed asset management needs. The list below represents a small sample of our broad and diverse client base.
